The pernicious role of the UN DECISION PALESTINIAN-ISRAELI PROBLEM

Seems indisputable assertion that the whole world around us is subject to the laws of physics, and all living things, including you and me, and even the laws of biology.

On this basis, based on the laws of thermodynamics of biological systems, it can be argued that the idea of an independent Jewish state to reconstruct all two thousand years continuously hung in the air and waited for hours to implement it in the same way as to present the idea of hanging in the air to build a third Church and waiting for his time.

This time it was in the late 19th century and the middle of the 20th, no matter what the state of Israel was created.

However, when the fact of its creation of a Jewish state was inevitable, some UN organizations, in violation of its own Charter, enable it to decide that, instead of a single state in Palestine would be two - Jewish and Arab, and even in what borders that was done in 1947. Moreover, this decision was made not by a unanimous vote. Referring once more to the science, we note that the truth is not determined by majority vote. And it follows that the accuracy and validity of this decision is not a fact.

As a result of certain historical events Palestinian Arab state has not arisen. However, the idea of its creation, supported by pseudo UN resolutions since 1948 continuously excites the Arab population of Israel and the Palestinians with Jordanian passports, as well as Arab terrorists of all stripes to unflinchingly its creation, despite the absurdity of the claim.

The absurdity of this requirement is that it has no reason to run, including the historical, as in Palestine was never any Arab states.

Therefore the policy of the United Nations to impose Israel Palestinian problem and continually making a big fuss the international community on this issue with the increasing conflict between Jews and Arabs calling themselves Palestinians/

Thus, the main source of tension in the Middle East is an international conspiracy against Israel under the roof of the United Nations.

Based on the above, the UN is not a de facto international organization, to which, in accordance with its Articles of Association shall be as follows:

1. To maintain international peace and security, and to that end: to take effective collective measures for the prevention and removal of threats to the peace and the suppression of acts of aggression or other breaches of the peace and by peaceful means, in accordance with the principles of justice and international law, adjustment or settlement of international disputes or situations which could lead to a breach of peace;

2. To develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, and to take other appropriate measures to strengthen universal peace;

3. To achieve international cooperation in solving international problems of an economic, social, cultural or humanitarian character and in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, religion, and

4. To be a center for harmonizing the actions of nations in the attainment of these common ends.
